

## HW-6 QlikView BI Dashboard

### Overview

This project assignment will give you a hands-on practice working with **QlikView Desktop Application** to create BI dashboard / visualization.

- Assignment points: 10 points or 10% toward your final grade.
- Due date: **7/15/2020, 11:59 pm.**
- Late submission: grace period of 2 days with 20% late penalty. After that time, assignment will NOT be accepted.
- This is open book exam and any kind of resource materials are allowed.
- Submission: submit your assignment in **PDF format in Canvas.**
- You need to submit **Section 1, 2 and 3** output pdfs into canvas. You can submit 3 separate pdfs or one combined output into one pdf.
- You can save your QV output result as follows:

File - Print Sheet – select printer as Abode PDF – Print - Save your pdf.

### Data Input

Please download below **6 QVD files from Canvas.** These QVD files were created from HW-5 DW database using MySQL ODBC connection. These are your input files for this project assignment.

Name
 Fact_ProductSales.qvd
 Dim_Store.qvd
 Dim_SalesPerson.qvd
 Dim_Product.qvd
 Dim_Date.qvd
 Dim_Customer.qvd

**Please follow below steps to complete this assignment:**

Open Qlikview application

Go to File – New (or, Ctrl + N or, use menu icon)

Close Wizard pop-up with clicking **X**

Getting Started Wizard: Create a new document

Save file as '**QV\_Sales\_DW.qvw**' in your local machine.

- Open Edit Script (Ctrl + E or use menu icon)

- Add a new Tab and name as '**Data Load**'

**- Load QVDs as follows:**

Click on 'Table Files ..'

Select '**Fact\_ProductSales.qvd**'

Click 'Open'

Make sure file type 'Qvd' is selected and click 'Finish'

This will create scripts as below.

Make sure to give table name on the **TOP** of the scripts ends with colon ( : )

**Fact\_ProductSales:**

**Directory;**

**LOAD**

TransactionId,  
SalesInvoiceNumber,  
DateKey,  
StoreID,  
CustomerID,  
ProductKey,  
SalesPersonID,  
ProductCost,  
SalesPrice,  
Quantity

**FROM**

DataSource\Fact\_ProductSales.qvd (**qvd**);

Load rest of the QVDs in similar way and give table name on the **TOP** of the scripts ends with colon ( : )

Dim\_Product:  
Dim\_Customer:  
Dim\_Store:  
Dim\_SalesPerson:  
Dim\_Date:

Add **EXIT SCRIPT;** at the end of your scripts

Save file and Reload (Ctrl + R or use menu icon)

Let me know if you've any issues on LOAD statements.

Once all load statement successfully completed, all tables with data from HW-5 DW will be available into QlikView application.

## Section 1: Total Points: 2

- a. Review your **data model from table viewer**, re-align tables so that all tables and columns are fully visible as per star schema, as shown below in **Appendix – 1**.

To save your output: From menu, Print and save data model as QV\_DataModel.pdf.

## Section 2: Total Points: 5

Rename 'Main' Sheet to '**Tables**' and create tables as shown below in Appendix – 2.

- a. Create filters using **multi-box** and current selections box as in appendix – 2.
- b. Add Year and Month **list box** at the top as in appendix – 2.
- c. Create **Table Box** and **Pivot Table** objects as in appendix – 2.

Select CustomerName = **Elon Musk**  
Select Year = **2017** and MonthShort = **Jan**

To save your output: From menu, File - Print Sheet – Print and save as QV\_Tables.pdf.

### Section 3: Total Points: 3

Add Sheet and name as '**Charts**' and create charts as shown below in Appendix – 3.

- a. Copy filters, current selections, Year and Month list boxes from 'Tables' tab.
- b. Create **Bar Chart** and **Pie Chart** objects as shown in appendix – 3

Make sure your filters are still selected:

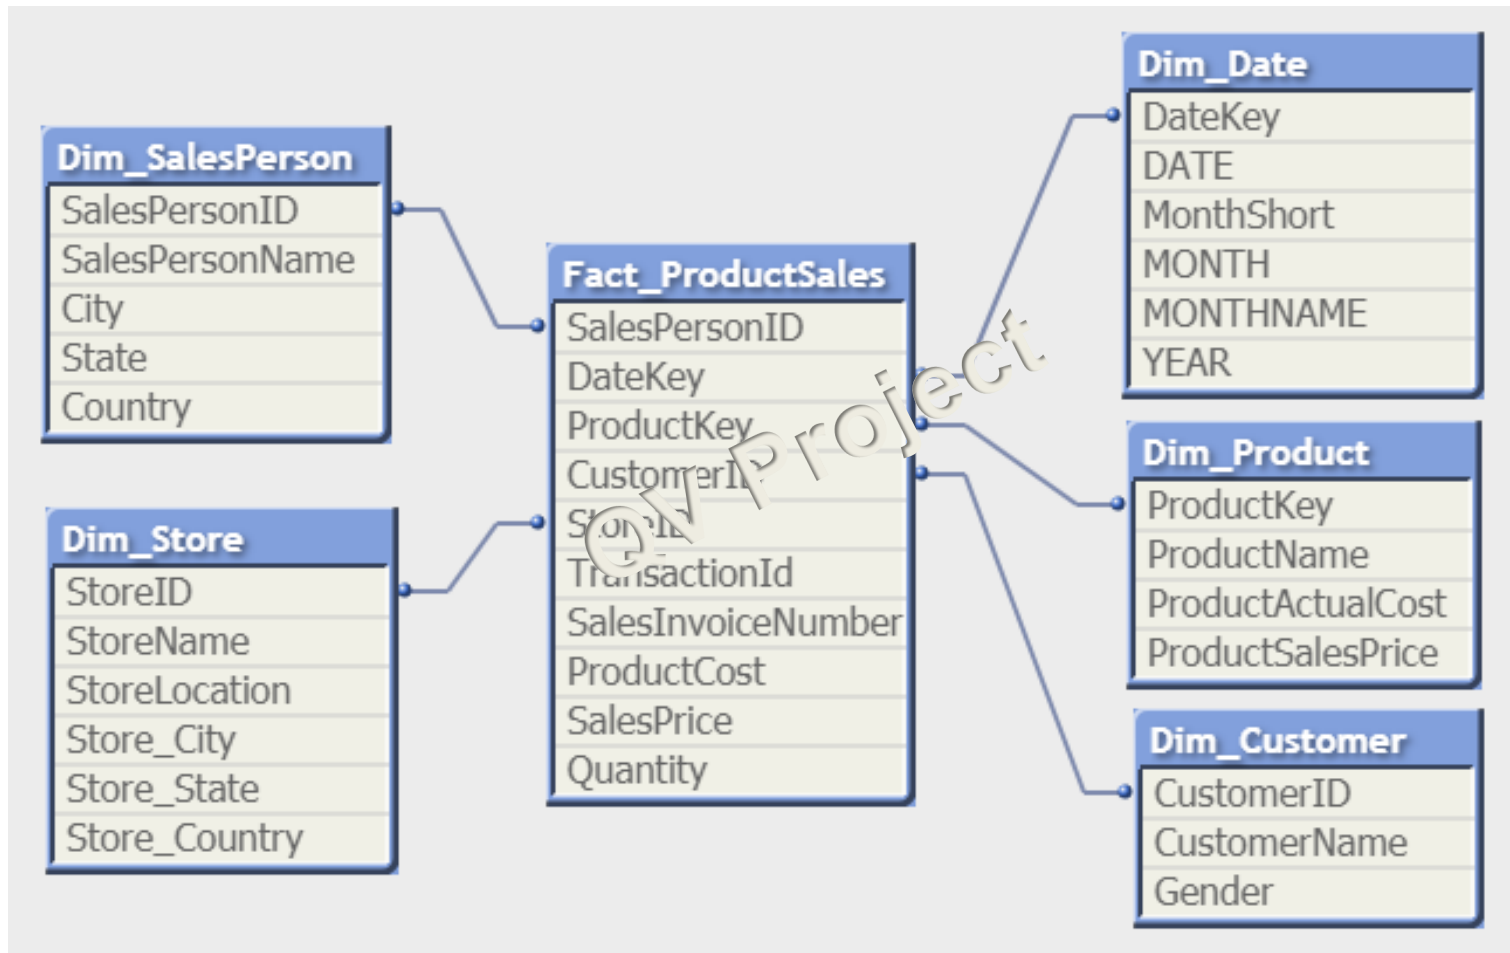

Select CustomerName = **Elon Musk**

Select Year = **2017** and MonthShort = **Jan**

To save your output: From menu, File - Print Sheet – Print and save as QV\_Charts.pdf

Note: Object size and colors do not need to match. However, your all objects, headings and texts need to be clearly visible.
